

Instructions for 8"x8" snowflake:

- Print design on 8.5x11 copy paper.
- Following the dotted lines, cut out an 8x8 square (you may need to redraw the square if cut off due to your printer's margin settings).
- Fold in half to create a rectangle. Fold in half again to create a square.
- Fold along the line to create a triangle.
- Draw a design below the animal. Make sure this design touches at least one edge ***and*** at least one part of the animal. See our blog for ideas and inspiration.
- Using sharp scissors, cut away the white space. Make sure the edges of the animal connect to the side edges of the triangle.
- Printed side is the back! Display your "herp-flake" with pride!
